S. A. E. JOURNAL

INDEX TO VOLUME XXVII, JULY-DECEMBER 1930

DIVISION OF PAGES BY MONTHLY ISSUES

July	1-130	September	247-382	November	499-628
August	131-246	October	383-498	December	629-736

(D) indicates discussion published; (N) indicates mention in news report; (P) indicates paper published.

Author Index

Author	Title of Paper	Page
Abbott, Franz D.	Evaluation Tests for Rubber Vibration-Insulators	(P) 600
Aldrich, Elizabeth W., and O. C. Bridgeman	Effect of Weathering on the Vapor-Locking Tendency of Gasolines	(P) 344
Aldrich, Elizabeth W., and O. C. Bridgeman	The Properties of Gasoline with Reference to Vapor Lock	(P) 93
Aldrin, Edwin E.	Knock Values of Aviation Fuels (N) 373	(P) 692
Allen, H. H., D. B. Brooks and N. R. White	Atmospheric Conditions and Knock Testing	(P) 56
Aston, A. C.	Tests Show Oil Changing Unnecessary	(N) 519
Austin, Dwight E.	Motorcoaches Designed and Built by an Operator	(P) 544
Baender, Prof. F. G.	Lubricating Oils and Their Suitability for Internal-Combustion Engines	(N) 527
Bauer, W. C.	Vapor-Locking Tendencies of Automotive Fuel-Systems	(D) 352
Beck, W. A.	Erratic Performance of Blended Oils	(N) 519
Beisel, Rex	Possibilities of the Liquid-Cooled Aircraft Engine	(P) 403
Bellanca, Giuseppe M.	Amphibian Design and Transportation	(P) 462
Blackburn, L. A., J. W. Brussel and A. R. Fors	Controlling Factors in Machine-Tool Obsolescence	(N) 617
Boyer, Marion	Hydrogenation	(N) 520
Brandenburg, Dr. G. C., and Ammon Swope	Preliminary Study of Riding-Qualities	(P) 355
Bridgeman, O. C.	Relation of Gasoline to Engine Design	(N) 622
Bridgeman, O. C., and Elizabeth W. Aldrich	Effect of Weathering on the Vapor-Locking Tendency of Gasolines	(P) 344
Bridgeman, O. C., and Elizabeth W. Aldrich	The Properties of Gasoline with Reference to Vapor Lock	(P) 93
Bridgeman, O. C., and Hobart S. White	The Effect of Airplane Fuel-Line Design on Vapor Lock	(P) 444
Bridgeman, O. C., and Hobart S. White	The Vapor-Locking Tendencies of Aviation Gasoline	(P) 218
Brooks, D. B., N. R. White and H. H. Allen	Atmospheric Conditions and Knock Testing	(P) 56
Brown, K. T.	The Service-Manager's Job	(N) 492
Bruce, C. S.	Automobile-Engine Acceleration	(P) 274
Bruce, C. S.	Used Oil Good When Abrasive Particles Are Out	(N) 518
Brussel, J. W., L. A. Blackburn and A. R. Fors	Controlling Factors in Machine-Tool Obsolescence	(N) 617
Bryant, E. J.	Wear and Tolerances on Gages (N) 505	(P) 553
Buckendale, L. Ray	Effect of Low-Pressure Tires on Axle Design	(P) 24
Campbell, D. J.	Casting Cylinders in Green Sand	(D) 91
Cautley, John R.	Airplane Landing-Gear	(N) 730
Chase, Herbert	American Passenger-Car Gearsets (D)	163, 475
Chase, Herbert	Gears, Futuristic and Otherwise	(N) 634
Collins, Paul F.	Air Transportation	(N) 633
Conniff, Joseph	Successful Bus Operator	(N) 632
Cooke, Harte	Diesel Engines	(N) 619
Cooper, Edwin	Development of Aircraft Engine in Last 20 Years	(N) 523
Crane, H. M.	Aircraft and Motor-Car Powerplants Compared (N) 249	(P) 709
Crowley, John W.	Flight Research on Maneuverability and Spin (N) 251	(P) 665
Cummings, H. K.	Gasoline Requirements of Commercial-Aircraft Engines	(N) 212
Cummins, C. L.	Diesel Engines for Automobiles (P) 285	(D) 290
Davidson, W. J.	What About Inventions?	(P) 295
Davis, W. F.	In-Line versus Radial Aircraft-Engines	(P) 451
Doolittle, J. H.	Aviation in Europe and America	(N) 729
Doolittle, J. H.	Volatility Requirments of Aircraft Fuels (N) 373	(P) 699
Dowdell. Dr. R. L., E. M. Staples and C. E. Eggenschwiler	Bearing Bronzes with Additions of Zinc, Phosphorus, Nickel and Antimony	(P) 45
Dresser, Sidney R., and Milton A. Kent	What Engineering Has Done for the Garage	(N) 725
Edwards, H. C.	Comparison between Diesel and Gasoline Engines	(N) 623
Edwards, J. A.	Manufacture and Use of Lead-Base Lubricants	(N) 727

Author	Title of Paper	Page
Eggenschwiler, C. E., E. M. Staples and Dr. R. L. Dowdell	Bearing Bronzes with Additions of Zinc, Phosphorus, Nickel and Antimony	(P) 45
England, E. C. Gordon	The Body Problem and Its Solution	(P) 69
Fageol, Frank R.	The Trend of Motorcoach Design	(P) 18
Favary, Ethelbert	High-Compression Engines	(N) 388
Favary, Ethelbert	Motor-Vehicle Cost Analyzed	(N) 377
Folsom, L. T.	Exhaust Temperatures as Related to Air-to-Fuel Ratio	(N) 480
Fors, A. R., L. A. Blackburn and J. W. Brussel	Controlling Factors in Machine-Tool Obsolescence	(N) 617
Frehse, A. W.	Fundamentals of Brake Design	(P) 170
Gassner, Alfred A.	Weight Saving by Structural Efficiency (N) 253	(P) 466
Gephart, Valentine	Corrosive Action in Water-Jackets	(N) 726
Gill, W. A.	Automotive Maintenance Problems	(N) 521
Gilmore, Don F.	The Service Manager and the Customer	(N) 521
Goll, Frank D.	Aluminum Alloys Used in Commercial-Motor Vehicles (N) 517	(P) 637
Hall, Charles Ward	Weight Saving by Structural Efficiency	(N) 254
Hall, E. S.	Engines Having the Cylinders Parallel to the Shaft	(P) 408
Harper, Lieut. Carl Brown, U. S. N.	Why Airplanes Spin (N) 255	(P) 560
Harris, Manse M.	Exhaust Valves	(N) 391
Hawks, Capt. Frank	Gliding and Its Possible Utility	(N) 124
Hawks, Capt. Frank	High Speed Aids Safety	(N) 375
Heron, S. D.	Fuel Requirements of the Gasoline Aircraft-Engine (N) 372	(P) 694
Herrick, Edward D.	Aircraft-Engine Design for Low Cost (N) 247	(P) 597
Herschel, Winslow H.	Re-refining Crankcase Oil	(P) 671
Hewitt, H. B.	Inspection on a Scientific Basis	(N) 513
Hill, H. D.	Small Diesel Engines (P) 282	(D) 290
Hoffman, A. H.	Road Tests of Air-Cleaner Restriction	(P) 237
Horning, H. L.	European Impressions	(N) 631
Hough, J. H.	Applications and Economics of Conveyors (N) 504	(P) 646
Hovgard, Paul E.	Spinning Experiments (N) 369	(P) 571
Hughes, Adrian, Jr.	Taking Advantage of Latent Heat of Cooling Water	(N) 515
Hull, L. M., and E. A. Robertson	Suppressing Ignition-Interference on Radio-Equipped Aircraft	(P) 78
Insley, Robert	What Aircraft-Engine Designers Learn from Automobiles	(P) 137
Irgens, F. T.	Development of Outboard Engines	(N) 618
Jacobs, H. D.	Traffic Congestion in Pittsburgh	(N) 620
Jacobs, V. R.	Air Transportation by Means of Dirigibles	(N) 620
Jardine, Frank	Thermal Expansion in Automotive-Engine Design	(P) 311
Jardine, Robert	Valve Problems and Their Solution	(N) 619
Jehle, Ferdinand	A Valve-Clearance Indicator	(P) 473
Johnson, W. M.	Driving at Night	(N) 526
Johnston, H. E.	Free Wheeling	(N) 725
Jones, O. B.	The Tool Engineer's Place in Production	(N) 503
Jones, W. R.	Steel Airplane Construction	(N) 115
Joyce, Temple N.	Experience with Spins (N) 370	(P) 563
Kent, Milton A., and Sidney R. Dresser	What Engineering Has Done for the Garage	(N) 725
Kettering, Charles F.	Vehicle-Driver Psychology	(N) 493
Klein, Dr. A. L.	The Wind-Tunnel as an Engineering Instrument	(P) 87
Kummer, F. A.	Packard Diesel Aircraft Engine	(N) 124
Larson, C. M.	Diversity of Fuels Demanded (N) 373	(P) 686
Lay, Prof. W. E.	Highways and Vehicle Taxes	(N) 720
Ledwinka, Joseph	Bodies for Front-Drive Cars	(P) 470
Lehoczhy, Paul	The Effect of Time on Production Cost	(N) 503
Le Page, W. Laurence	The Autogiro Analyzed	(P) 257
Lott, E. P., and W. L. Smith	The Operator's Airplane and Engine Requirements	(P) 393
Lowe, J. S.	Driver-Training for Maintenance Cost-Reduction (N) 517	(P) 591
MacGregor, J. R.	The Significance of the A.S.T.M. Distillation Test for Gasoline	(N) 731
MacLean, A. D.	Motorboat Development	(N) 527
Magness, Lawrence F.	Use of High-Grade Oils	(N) 524
Maltby, C. S.	Metropolitan Cleveland—Its Future	(N) 727
Manley, R. E.	Service Equipment	(N) 728
Marsh, Herbert	Airplane and Engine Servicing	(N) 523
Masury, A. F.	Engine Lubrication	(N) 518
Mattice, L. C.	New Austin Car	(N) 523
McCoy, William H.	The Future of Tungsten-Carbide as a Cutting Tool (N) 501	(P) 557
McCutcheon, W. W.	Airplane Dopes and Lacquers and Their Application	(P) 263
McVitty, E. W.	The Aircraft-Fuel Problem (N) 372	(P) 682
Mead, George J.	In-Line Liquid-Cooled versus Air-Cooled Engines	(P) 143
Middleworth, H. V.	Self-Maintenance as Compared with Service-Station Maintenance (P) 197	(D) 333
Minshall, R. J.	Present Tendencies of Military and Commercial Aircraft Design	(N) 376

Accelerometer
Gyro, for riding-quality analysis 112
National Advisory Committee for Aeronautics type 251, 666
Spark recording, for engine testing 275

Accidents and Accident Prevention
Aircraft
Commercial operation safer 634
Engine as source of 139
Fire
Diesel engine as preventive 139, 279, 451, 623
Finishes as cause of 263
Gasoline hazard control 373, 702
Glider 583
International Aerial Safety Congress 4
Radio as preventive 85
Safety of 389
Speed, safety increased by 375
Spinning 560, 563, 567, 569, 573
Vapor lock as cause 107, 232, 622
Automotive
Cost 209
Driver responsibility for 493, 620
Free-wheeling effects 633
Headlighting effects 526, 607, 623
Traffic congestion and control 606, 635
Motorcoach
Driver control and training 21, 334, 517, 545, 594
Speed-control methods 21, 536
Motor-truck
Driver control 337
Safety of 322

Air-Cleaners
Air-flow through
Road Tests of Air-Cleaner Restriction 237
Measurements of 238
Test methods 237
Design details 238
Motorcoach-engine use of 520
Motor-truck-engine use of 518

Aircraft Design and Construction
Development of a Safe Airplane 338
The Operator's Airplane and Engine Requirements 393
Amphibian
Amphibian Design and Transportataon 462
Design difficulties 462, 464
Improvements desired 463
Appearance, importance of 456
Army
Design affected by 561
Types used 376
Autogiro
The Autogiro Analyzed 257
Design described 260, 262
Theory analyzed 258
Windmill lifting-system 257
Wing loading 569
Automobile compared with 121
Biplane 377, 561, 568
Brakes, hydraulic 730
Center of gravity 369, 370, 561, 568, 570, 571, 574, 577, 578
Cockpit 396
Control surfaces 581, 589
Decallage and washout 369, 572
Drag
Increasing, devices for 87, 89
Reduction 87, 144
Engine effects 398, 400, 455, 456, 457, 458, 713
Finish
Airplane Dopes and Lacquers and Their Application 263
Application 265, 266
Cleaners 267
Fire hazard 263
Nature and manufacture of 263
Pigments 266, 267
Tests 264
Gliders
Safety and Serviceability in Primary Gliders 583
Control and tail surfaces 589
Design requirements 583
Fuselage 587
Landing gear 585
Launching 584, 589
Training type 584
Wings 588
Landing gear 87, 339, 376, 377, 396, 462, 463, 464, 585, 730
Lift-increasing devices 87
Lighter-than-air 621
Makes described
Aeromarine Klem 463
Alexander Bullet 567, 569
Autogiro 257, 339, 569, 723
Bellanca 462
Bristol 565
Cadillac 465
Canard 253

(See also Standardization Activities, S.A.E.)

Screw-Thread Standardization 118

Shock-Absorbers, Aircraft
- **Function** 730
- **Strut-end standardization** 365, 489

Six-Wheel Vehicles
- **High-speed** 187
- **Load distribution in** 28

Springs, Suspension
- **Motorcoach** 544
- **Motor-truck** 194
- **Tires, low-pressure, effects** 26

Springs, Valve, Small Diameter Preferred 623

Standardization Activities, S.A.E.
- **Aircraft**

Page

Standardization Activities, S.A.E. (*Concluded*)
- **Aluminum-alloy shapes, extruded** 360, 489
- **Army and Navy cooperation with** 401
- **Bolt and nut** 365, 489
- **Pin, flat-head** 118
- **Pulley and pulley spacer** 118
- **Rivet** 365
- **Shock-absorber strut-end** 365, 489
- **Tie-rod** 118
- **Tire** 365
- **Washer, bevel** 365
- **Aircraft engine**
  - **Center of gravity indication** 482
  - **Propeller hub** 481
  - **Tapered shaft-end** 118, 481
- **Ball and roller bearing** 241
- **Diesel engine** 483
- **Electrical equipment** 118
- **Lubricant**
  - **Antiknock rating** 241, 716
  - **Viscosity numbers** 118
- **Machine-pin** 605
- **Motorboat** 719
- **Motorcoach** 716
- **Motor-truck** 189, 716
- **Non-ferrous metal** 118
  - **Nickel plating** 483
- **Reports approved** 118
- **Roller chain** 242
- **Screw thread** 118

Steel
- **Aircraft use of** 115, 255, 401, 462
- **Automotive use of** 520
- **Bodies** 70, 73, 729
- **Engines, aircraft** 138, 140, 141
- **Gage** 553
- **Improvements in** 188
- **Stainless** 115, 255, 521, 522
- **Thermal expansion** 311
- **Tool** 500, 502, 549, 558
- **Valve** 619

Steering Systems
- **Brake effects on** 25, 181, 184
- **Tire, low-pressure, effects on** 28

Supercharging
- **Aircraft engine**
  - GEARED CENTRIFUGAL-SUPERCHARGERS FOR AIRPLANE ENGINES 148, 340
  - **Altitude operation** 153, 341
  - **Aluminum used in** 151
  - **Carbureter connections** 150
  - **Cost factors** 138, 341
  - **Efficiency** 342
  - **Exhaust-turbine type** 149, 341
  - **Fuel consumption affected by** 152, 342
  - **Geared type** 149, 340, 342
  - **Induction affected by** 151, 340, 341, 342
  - **In-line engine use of** 452
  - **Limitations on** 153
  - **Power increased by** 146, 153
  - **Power required** 342
  - **Radial air-cooled engine use** 153, 340, 342, 406
  - **Sea-level operation** 152, 341
  - **Speed** 149, 153, 341
- **Diesel engine** 293
- **Industrial uses** 149
- **Two-stroke cycle** 341
- **Weight** 341

T

Tail-Lamps, Green versus Red 623

Temperatures
- **Brake** 28, 31, 32, 174, 184
- **Engine**
  - **Aircraft** 250, 270, 273, 343, 371, 457, 679, 684, 712
  - **Combustion** 422, 427, 432
  - **Diesel** 285, 291
  - **Fuel-feeding systems** 35, 107, 108, 109, 622
  - **Increasing, dangers of** 306
  - **Oil** 270, 273, 308, 309, 343, 457
- **Metals, thermal expansion of** 311
- **Tire** 662

Testing
- **Air-cleaner** 237
- **Aircraft** 87, 251, 255, 370, 480, 562, 564, 571, 573, 574, 578, 579, 627, 667, 670
- **Bearing** 47
- **Brake** 183
- **Engine**
  - **Acceleration** 274
  - **Aircraft** 401, 711
  - **Run-in** 718
  - **Service** 522
- **Finish, aircraft** 264
- **Gasoline**
  - SIGNIFICANCE OF TESTS FOR MOTOR FUELS 33
  - **Aviation** 680, 684
  - **Bibliography** 41
  - **Color** 40
  - **Corrosive action of** 40
  - **Evaporating tendency** 35
  - **Gum** 38, 214, 216, 233, 374, 683, 698, 702, 706
  - **Sulphur content** 40, 214
  - **Vapor-locking tendency** 94, 98, 100, 106, 218, 230, 344, 350, 353, 372, 373, 374, 689, 697
  - **Volatility** 33
  - **Weathering** 344
- **Lubricant, gear and bearing** 727
- **Oil** 527, 634, 673, 676

Page

Testing (*Concluded*)
Riding-qualities 111, 355
Rubber Vibration-Insulators, Evaluation Tests for 600
Wind resistance 8, 14

Tires
Low-Pressure Tires, Effect of, on Axle Design 24
Aircraft 365, 730
Brake effects 25, 26, 28, 31, 32, 174, 178, 179, 184
Carrying capacity 28, 655
Dual 25
Friction coefficient 184
Impact tests 325, 329, 611
Motorcoach 26, 323, 325, 329, 331, 655
Motor-truck 26, 188, 189, 193, 194, 195, 323, 325, 329, 331, 655
Rolling resistance 660
Temperature 662

Tools
Engineering 503
Machine-pin standardization 605
Tungsten-carbide
The Future of Tungsten-Carbide as a Cutting Tool 557
Aluminum machining with 317, 501, 502, 548, 549, 550
Bibliography 557

Transmissions
American Passenger-Car Gearsets 163, 475
Constant-Mesh or Sliding-Gear Transmissions 161
Auxiliary 167, 169, 476
Dashpot for modifying clutch engagement 165
Efficiency 656
Four-speed
Advantages 163, 165, 166, 168, 169, 308, 475, 634
Disadvantages 155, 163, 168, 169
Over versus undergearing 476
Trends 633, 634
Four-wheel drive, future use of, predicted 656
Free wheeling 525, 621, 633, 635, 725

Page

Transmissions (*Concluded*)
Gear-changing, engine-speed, road-speed and hill-climbing effects 16
Gearless, one-pedal, automatic Spontan 164, 169
Lubrication 727
Motorcoach 657
Noise reduction 161, 163, 165, 166, 476
Stresses in 168, 727
Synchromesh 635
Three-speed
Advantages 168, 635
Disadvantages 475
Unconventional types 164, 169, 525
(See also Gears)

Transportation
Congestion 620, 635
Engineering 606, 636
Railroad
Aviation
Comparison with 634
Coordination with 321, 610
Motorcoach and motor-truck relations with 320, 609, 610
Passenger-car competition with 610
Traffic control 609, 612
